

Logging.DEBUG

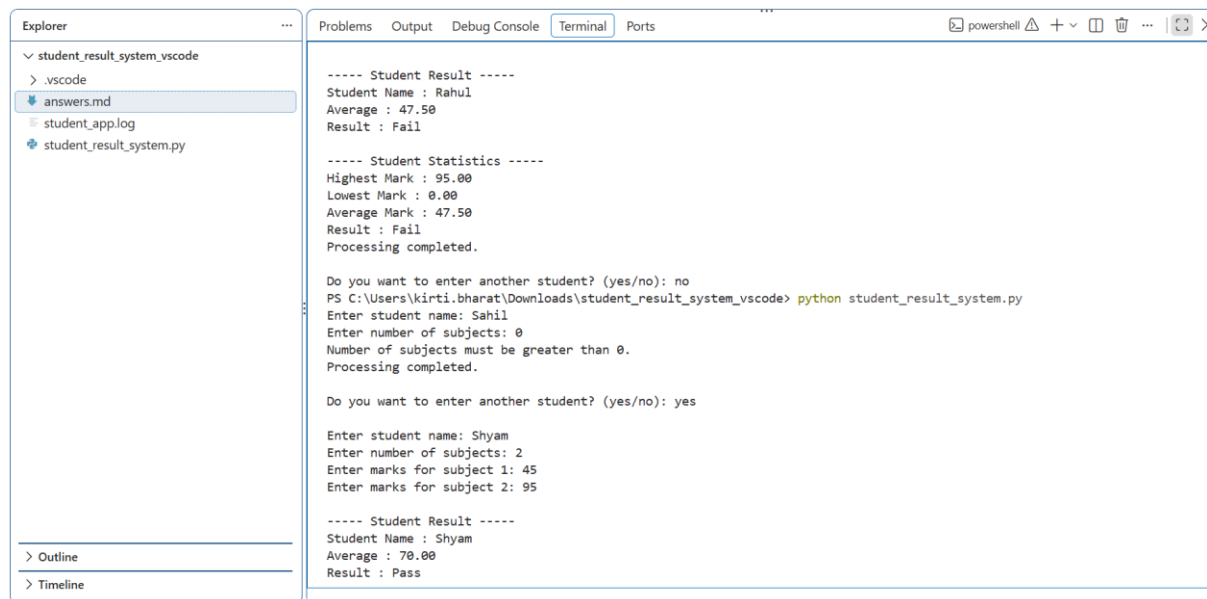

The screenshot shows the VS Code interface with the Explorer panel on the left and the Terminal panel on the right. The Explorer panel displays the file structure of the 'student_result_system_vscode' project, including '.vscode', 'answers.md', 'student_app.log', and 'student_result_system.py'. The Terminal panel shows the output of running 'python student_result_system.py'. The script prompts for student name, number of subjects, and marks for three subjects. It then calculates the average and result for the first student (Ananya) and displays the student statistics. The script then prompts for another student, which is declined.

```
PS C:\Users\kirti.bharat\Downloads\student_result_system_vscode> python student_result_system.py
Enter student name: Ananya
Enter number of subjects: 3
Enter marks for subject 1: 85
Enter marks for subject 2: 78
Enter marks for subject 3: 92

----- Student Result -----
Student Name : Ananya
Average : 85.00
Result : Very Good

----- Student Statistics -----
Highest Mark : 92.00
Lowest Mark : 78.00
Average Mark : 85.00
Result : Very Good
Processing completed.

Do you want to enter another student? (yes/no): no
PS C:\Users\kirti.bharat\Downloads\student_result_system_vscode> python student_result_system.py
Enter student name: Rahul
Enter number of subjects: abc
Please enter a valid number.
Enter number of subjects: 2
Enter marks for subject 1: 120
Marks must be between 0 and 100.
Please enter the marks again.
Enter marks for subject 1: 0
Enter marks for subject 2: 95
```

The screenshot shows the VS Code interface with the Explorer panel on the left and the Terminal panel on the right. The Explorer panel displays the file structure of the 'student_result_system_vscode' project, including '.vscode', 'answers.md', 'student_app.log', and 'student_result_system.py'. The Terminal panel shows the output of running 'python student_result_system.py'. The script prompts for student name, number of subjects, and marks for two subjects. It then calculates the average and result for the first student (Rahul) and displays the student statistics. The script then prompts for another student, which is declined. The script then prompts for another student, which is accepted, and the script prompts for student name, number of subjects, and marks for two subjects. It then calculates the average and result for the second student (Shyam) and displays the student statistics.

```
----- Student Result -----
Student Name : Rahul
Average : 47.50
Result : Fail

----- Student Statistics -----
Highest Mark : 95.00
Lowest Mark : 0.00
Average Mark : 47.50
Result : Fail
Processing completed.
